

GoldVu Offers the Most Advanced Solution for Dealing with Physical Precious Metals

Buying and Selling:

The market is supported by organisations (liquidity providers and market makers) who supply allocated physical bullion for storage and delivery around the world. This exchange-style architecture, consisting of multiple buyers and sellers, means that our clients have access to lower premiums and tighter spreads than would otherwise be available through the typical bullion dealer model.

Allocated Precious Metal Holdings:

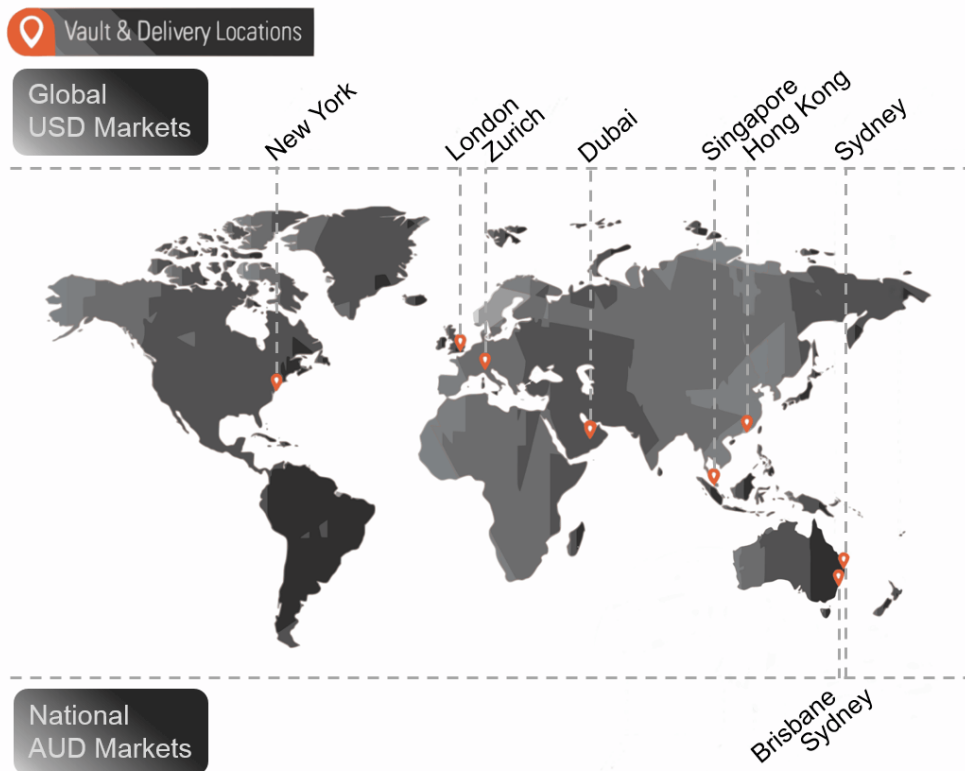

Legal title remains with the client at all times, with the bullion being stored on the client's behalf. This is considered to be one of the most transparent and safest forms of bullion investment.

Storage and Security:

Storage and transportation: Malca-Amit (Global) Loomis International (Global) and Armaguard (Australia) Inspection, verification and audit: BDO and Inspectorate.

Fund Segregation:

All client trading funds are held in segregated, regulated trust accounts with Australian authorised deposit-taking institutions. The client trust accounts are administered and audited according to the regulations imposed under Australian law.

Trade Locally or Globally:

Clients can trade USD-denominated precious metal in our following 7 Trading Hubs; Dubai, London, New York, Hong Kong, Sydney, Singapore, and Zurich. A further 2 vaults are available in Australia when using AUD.
